

Usman Haider

Senior Full Stack & Platform Engineer

usmanhaider461@gmail.com | +92 304 043 9740 | GitHub | LinkedIn

Professional Summary

Experienced Software Engineer with 4+ years building scalable, user-centric platforms and distributed systems. Proven success delivering high-impact web and cloud applications for enterprise environments using modern stacks such as React/Next.js, Node.js/NestJS, and PostgreSQL/MongoDB. Adept at designing and implementing robust APIs, real-time features, and CI/CD pipelines, with strong analytical problem-solving and cross-functional collaboration experience. Seeking to bring engineering excellence and platform-level impact to world-class technology teams.

Skills

Frontend: React, Next.js, Vue.js, Redux, Tailwind, Material UI

Backend: Node.js, Express, NestJS, GraphQL, REST APIs

Databases: MongoDB, PostgreSQL, MySQL, Prisma, Sequelize

Cloud & DevOps: AWS (EC2, S3), Docker, Jenkins, Git, CI/CD

Realtime & APIs: WebRTC, Socket.IO, Stripe, Webhooks

Mobile: React Native (iOS & Android)

Experience

Senior Full Stack JS Engineer – Nextbridge 2022 – Present

- Architected and delivered scalable microservices and frontend platforms for enterprise clients, focusing on performance, maintainability, and observability.
- Led API design and service integration for high-throughput data flows with PostgreSQL and MongoDB.
- Partnered with cross-functional teams to translate business requirements into production-ready solutions.
- Implemented CI/CD workflows and cloud deployment strategies to improve release quality and frequency.

Full Stack Developer – Phaedra Solutions 2021 – 2022

- Built full-stack applications using React, Next.js, Node.js, and GraphQL with Dockerized deployments.
- Mentored junior developers and established shared coding standards across teams.

MERN Stack Developer – Falcon IT Consulting 2020 – 2021

- Developed commercial web platforms using TypeScript, Material UI, and Node.js, focusing on component reusability and performance.

Selected Projects

Enterprise Insurance Platform – InsuranceMarket.ae

Designed and developed a multi-tenant insurance marketplace platform using React, Next.js, Node.js, and AWS. Implemented secure APIs and integrated payment gateways to serve thousands of active users.

Holoconnects – Real-Time Hologram Collaboration

Led frontend architecture and WebRTC integration for a real-time immersive communications product using Vue.js and Node.js, achieving sub-second interaction latency.

EasyGift – E-Commerce Platform

Full-stack ecommerce solution with Next.js frontend and NestJS backend, including Stripe payment integration and order automation workflows.

Modely – Mobile Booking App

Designed mobile UI and realtime services for a booking platform using React Native, Redux, and Socket.IO, improving engagement metrics and UX.

Internal Analytics Dashboard

Built internal BI dashboards for cross-team metrics and performance monitoring using React, Chart.js, and REST APIs, enabling stakeholders to track key KPIs.

Platform-Level API Suite

Designed and implemented a suite of platform APIs providing modular services for auth, notifications, and events — enhancing reuse and time-to-delivery across multiple projects.

Education

BS Computer Science – COMSATS University Islamabad
